

Christopher Bush

Software Engineering Manager | Lafayette, CO, USA | bush.codes@proton.me

+1 737-333-4381 | linkedin.com/in/christopherbush/ | github.com/bush-codes

SUMMARY

Software Engineering Manager with 7+ years of people management experience and 20+ years of software engineering experience leading distributed, remote-first engineering teams across the US, EU, LATAM, and APAC. Hands-on technical leader who remains an active builder while scaling teams, improving delivery, and driving business outcomes. Experienced in hiring, performance management, organizational change, agile delivery, cloud-native platforms, cost optimization, and cross-functional leadership across Product, Data Science, Design, Security, and Compliance.

CORE SKILLS

- People Management & Career Development
 - Hiring, Interviewing & Performance Reviews
 - Agile / Scrum / Kanban Delivery, SDLC Optimization
 - Distributed & Remote Teams
 - Roadmap Ownership & Prioritization, OKRs & KPIs
 - Stakeholder & Cross-Functional Leadership
 - Incident Management & On-Call Operations, SLOs & SLAs
 - Cloud-Native Systems (AWS, GCP, Kubernetes, Docker, Microservices)
 - Backend Engineering (Python, Java, Go, REST, FastAPI, Flask, Django, Postgres, SQL)
 - Managing Frontend Engineering Teams (React, Angular, HTML, CSS)
-

PROFESSIONAL EXPERIENCE

Regrow Agriculture — Software Engineering Manager, MRV

August 2023 – March 2025 | Remote

- Grew the MRV engineering organization from **4 to 11 engineers**, hiring and onboarding team members across Australia, the Americas, and the EU.
- Served as **first-line manager**, owning hiring, onboarding, regular 1:1s, performance feedback, and career development planning.
- Led the transition of the product engineering organization to **Scrum**, introducing shared roadmaps, sprint planning, retrospectives, and cross-team alignment.

- Acted as a **hands-on technical leader**, contributing backend Python features for new data entry workflows and integrations with scientific APIs.
 - Led the introduction of a **shared UI design system**, partnering with Design and frontend leadership to improve consistency, velocity, and maintainability.
 - Championed and led the migration from **Nomad to Kubernetes**, sunseting legacy infrastructure and achieving approximately **\$20,000/month in cloud cost savings**.
 - Partnered with Product Management to prioritize the Kubernetes migration by presenting **COGS reduction data** and long-term scalability benefits.
 - Resolved cross-team conflict by defining shared values, norms, and feedback mechanisms.
 - Improved operational workflows to accelerate customer issue resolution and reduce production friction, significantly improving **MTTR** and reducing escaped bug volume.
-

SailPoint — Software Engineering Manager, Data Intelligence

September 2021 – August 2023 | Remote

- Managed **17 engineers across two teams** (US, Ukraine, LATAM) building **AI-adjacent SaaS applications**, including identity analytics and anomaly detection capabilities.
 - Operated as a **manager-of-leads**, with a backend engineering lead and a frontend/UI engineering lead reporting directly to me.
 - Owned and led delivery of the **Outliers** feature, enabling detection of anomalous identities and access patterns.
 - Traveled to **Mexico City** to onboard **11 engineers in person** while SailPoint established its new Mexico City engineering office.
 - Led teams through periods of **significant organizational change**, maintaining delivery, morale, and clear communication in a distributed environment.
 - Owned people management responsibilities including hiring, performance reviews, promotions, coaching, and difficult performance conversations.
 - Led **FedRAMP compliance efforts**, partnering with Security, Legal, and Compliance teams to meet regulatory requirements in our migration to GovCloud.
 - Established and improved **operational excellence practices**, including SLOs, incident management, on-call rotations, alerting, and observability.
-

SparkCognition — Software Engineering Manager / Architect, SparkPredict

October 2019 – May 2021 | Austin, TX & Remote

- Managed **20 engineers across 5 scrum teams**, supporting backend services, UI development, time-series data ingestion pipelines, and shared infrastructure.
- Served as **first-line manager** for multiple teams, conducting regular 1:1s, performance feedback, hiring, and mentoring senior and junior engineers.
- Introduced Scrum practices, identified and developed technical leads, and improved delivery predictability across teams.
- Acted as **technical architect** for SparkPredict backend systems, evolving the platform from a monolithic MVP to a scalable microservices architecture.

- Partnered closely with Product and Data Science teams on time-series model execution, alerting systems, and multi-tenant APIs.

Team Lead / Senior Software Engineer, SparkPredict

November 2017 – October 2019

- Led backend engineering for time-series data ingestion, large-scale data processing, model execution services, alerting systems, and client-facing APIs.
 - Built and maintained microservices primarily in **Python** and Scala.
 - Supported release planning and execution using Kanban and Scrum practices.
-

TipCow — Founder & CTO

March 2014 – June 2018 | Austin, TX

- Founded and built TipCow, a live music tipping platform enabling fans to tip live musicians.
 - Hired and led an agile engineering team delivering a **Django/Postgres-backed web platform** and native **iOS and Android applications**.
 - Scaled the platform to **1,000+ bands registered nationwide**.
 - Owned all product, engineering, infrastructure, and deployment efforts (AWS EC2, RDS, Lambda, Beanstalk).
 - Conducted user research, A/B testing, and market validation to guide product decisions.
 - Built partnerships with the Austin Mayor's Office, festivals, and music organizations.
 - Achieved national recognition, including coverage in **Forbes**.
 - Represented the company at SXSW Interactive and multiple startup investor pitch events.
-

EDUCATION & CERTIFICATIONS

Master of Science, Computer Science (In Progress, Part-Time)

University of Texas at Austin

Bachelor of Science, Computer Science & Bachelor of Arts, Mathematics

University of Texas at Austin

Certified ScrumMaster (CSM) — Scrum Alliance

ADDITIONAL EXPERIENCE

Earlier career software engineering roles (2006–2017) at IBM, HP, Zilliant, and Microsoft are available on my LinkedIn profile. Full CV upon request.
